KLASS is a fantastically practical textured acrylic that replicates the quality appearance of slumped glass whilst eliminating the associated problems of weight, fragility, workability and cost. With 15 organic textures available in 4 different thicknesses and is available in clear or green tint.

KLASS delivers the design versatility required in texture, strength and installation for individual projects from domestic splashbacks to feature walls in commercial or retail fit outs. Klass can also be painted to give you your own customised look and feel to any colour you require.

The logo for Klass ILLUSIONS features a stylized sunburst or spiral icon to the left of the word "Klass" in a serif font, with "ILLUSIONS" in a sans-serif font below it, separated by a horizontal line.

## KUSTOM

KLASS KUSTOM offers a new dimension to textured acrylic. We can customize the acrylic by backspraying it with any colour of automotive metallic paint you desire. The metallic effect is dynamic in the way it settles into every crevice of the texture, creating somewhat of a 3D effect that is simply stunning. It is ideal for any flat surface paneling or cladding, for example bar front paneling, wall cladding or splash-backs. It's all up to your imagination. Create something truly unique with KLASS KUSTOM.
